

## COVID-19 / SARS-CoV-2 Recovery Support

### Back to work – how do you know your workplace was cleaned properly?

Now, more than ever, owners and managers need to exercise due diligence to be certain that their working environment is safe for their staff and clients.

There has been a recent surge in the number of cleaning companies appearing on the market offering disinfecting and sanitisation services. A recent article from the UK has raised concerns about the qualifications and quality provided by some of these operators, see [here](#).

We offer a comprehensive set of **SARS-CoV-2** recovery services to ensure that premises closed for a period of time can be reopened safely and with assurance.

#### Services include:

- Development of a Sanitary Action Plan
- Independent Surface Verification for **SARS-CoV-2** affected surfaces
- Independent Verification for cleanliness levels on all surfaces
- Indoor Air Quality (IAQ) Assessment

Hibbs is the only private company in Australia with eight Certified Occupational Hygienists. Our team of professionals has the necessary expertise to provide independent consulting and testing services to verify the effectiveness of **SARS-CoV-2** cleaning protocols.

With more than 25 years of experience, our company has a track record of excellence in offering specialist risk management services.

————— We offer our services across New South Wales and Victoria —————
